Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Medical Diagnosis Center – Diagnostic Test Booking & Report Portal

User: Patient booking a diagnostic test and collecting the report online	
Says *What does the patient say out loud?* • "Is a slot free tomorrow morning?" • "How much will this test cost?" • "Can I get my report online?" • "If I cancel, how much do I get back?"	**Thinks** *What is going on in the patient's mind?* • "Will I have to wait in a long queue?" • "Did my booking actually get confirmed?" • "Is my medical data safe?" • "Will I lose money if I cancel?"
Does *What does the patient do?* • Browses the list of tests with price and duration • Picks a date and time slot and submits the booking • Checks My Appointments for approval status • Downloads the report once it is available • Calls the center when there is no update	**Feels** *What does the patient feel?* • Anxious while waiting for results • Relieved when the confirmation email arrives • Frustrated by double bookings and delays • Confident when every step is tracked online
Pains *Fears, frustrations and obstacles* • Phone or walk-in booking with no slot visibility • Slots that clash or are already full • No status updates after booking • Paper reports that must be collected in person • Unclear cancellation charges	**Gains** *Wants, needs and measures of success* • One-click booking from the Service Portal • Real-time slot availability and clear pricing • Instant confirmation and approval emails • Report created automatically and downloadable • Transparent refund (90% back on cancellation) • Access to own records only
