User Acceptance Testing (UAT)

Date	19 October 2026
Project Name	Medical Diagnosis Center – ServiceNow Service Portal
Maximum Marks	4 Marks

Project Overview

Project Name	Medical Diagnosis Center – ServiceNow Service Portal
Project Description	A ServiceNow scoped application for a Medical Diagnosis Center, supporting patient diagnostic test requests/bookings and related records through a Service Portal, with role-based access and staff-side record handling as configured.
Project Version	v1.0 (MVP)
Testing Period	05 October 2026 to 19 October 2026

Testing Scope

- Medical Diagnosis Center scoped application and custom tables for patient diagnostic test requests and related records.
- Patient-facing service portal forms, required-field validation, and correct mapping of submitted details to the relevant ServiceNow records.
- Medical Diagnosis Center Service Portal: patient access to diagnostic services, test booking/request submission, and report access where configured.
- Authorized staff reviewing and updating diagnostic request status and related records.
- Patient, lab staff, and administrator workflows documented in the Medical Diagnosis Center project user stories and planning documents.
- Only test optional notifications, automated workflows, or report features if they are implemented; record unimplemented features as out of scope.

Testing Environment

URL / Location	ServiceNow Personal Developer Instance – Medical Diagnosis Center Service Portal URL
Credentials (if required)	Use the configured patient/portal user and authorized lab staff or administrator test accounts, if available.

Test Cases

Fill the Actual Result and Pass/Fail columns while executing each test case.

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Open the Medical Diagnosis Center portal	1. Open the configured ServiceNow portal URL. 2. Check the page content and available options.	Portal loads successfully and displays the Medical Diagnosis Center content and available patient actions.		

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-002	Open diagnostic test booking/request form	1. Open the portal. 2. Select the diagnostic test booking/request option.	The correct booking/request form opens without an error.		
TC-003	Submit a request with valid details	1. Open the booking/request form. 2. Enter the required patient and test details. 3. Submit the form.	A request record is created and the submitted details are saved correctly.		
TC-004	Required-field validation	1. Open the request form. 2. Leave a required field blank. 3. Submit the form.	The form identifies the missing required information and prevents an incomplete submission.		
TC-005	View submitted request details	1. Submit a valid request. 2. Open the created record using an authorized account.	The record contains the submitted details and an identifiable request number, if configured.		
TC-006	Staff updates request status	1. Log in with an authorized lab staff/admin account. 2. Open a submitted request. 3. Update its status and save.	The status update is saved and is visible on the record.		
TC-007	Access control for patient information	1. Sign in with a portal/patient account. 2. Attempt to open a staff-only record or function.	Unauthorized access is blocked according to the configured roles and ACLs.		
TC-008	Access diagnostic report	1. Sign in with an authorized account. 2. Open the report section or report record, if implemented.	An available report is displayed only to an authorized user; if report access is not implemented, mark this test N/A and note it.		

Bug Tracking

No defects have been logged yet. Record each defect found during execution; do not mark tests as passed until verified.

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback

Notes

- Execute each applicable test case and record the actual result and Pass/Fail status.
- Use N/A for features not implemented and explain the reason in the feedback.
- Bug tracking should include severity, status and steps to reproduce.
- Obtain sign-off from the project supervisor or project owner after testing is completed.
